Memorandum

To: Director, WO-100 (MS-5662 MIB)

Through: Assistant Director for Minerals, Realty and Resource Protection (WO-300)

From: State Director /s/ Selma Sierra

Subject: Certification of Reclamation Cost Estimates and Action Plan for Deficiencies

DIV. OF OIL, GAS & MINING

The intent of Washington Office Instruction Memorandum 2006-0172 is to ensure that all mining activity authorized under the Surface Management Regulations, Exploration and Mining Wilderness Review Program and Disposal of Reserved Minerals under the Stockraising Homestead Act are properly bonded within the State of Utah. Attached is the Certification Report of reclamation cost estimates for mining activity described above that were examined and were adequate (Attachment 1). Also attached is our Action Plan for the bonds that could not be certified at this point in time (Attachment 2). An Instruction Memorandum will be issued directing field offices to diligently address Utah's 2009 Status and Action Plan 2010. Work will commence on all action items with a completion date of September 30, 2010 as feasible.

If you have any questions regarding our Action Plan or Certification Report, please call Terry Snyder of my staff at (801) 539-4026.

SALT LAKE FIELD OFFICE	SURFACE MGT-NOTICE	UTU 069198	S/045/0055	\$3,785	AUTHORIZED	Asking an additional \$11,953. Not received yet.
						The Cedar City Field Office has a single item on the State's Action Plan, this being a pre-2001, legacy small mine notice (UTU-74031, RMS #1) which the operator allowed to expire in 2001. The notice is presently unbonded and unreclaimed. In accordance with the procedures laid out in IM 2009-020, this office has completed step one, notifying the operator by certified mail of their outstanding reclamation obligation. No response was obtained from the operator from this noncompliance order. We have initiated step two of your guidance, transmitting an estimated reclamation cost to the operator. This letter also informs the operator that, if the necessary reclamation work, isn't performed in 30 days, BLM will complete it or contract it, and the operator will be billed for the actual reclamation cost. We anticipate that earthwork reclamation of this legacy site will be achieved by the end of FY-2010.

GRAND STAIRCASE-ESCALANTE	SURFACE MGT - NOTICE	UTU 067517			PENDING	The GSENM has a single item on the State's Action Plan. This item consists of a 1983 vintage exploration notice (UTU-67517, EFN Millsite, Kitchen Corral Wash) which the operator allowed to expire and which was neither bonded for reclamation nor satisfactorily reclaimed to date. The notice work covered the drilling of up to twenty test holes / monitoring wells and the excavation of up to twenty shallow trenches for soil testing to be used in support of a potential uranium mill tailings impoundment (the impoundment was never constructed). Some of the work was carried out on adjoining State trust lands that have since been acquired by the BLM through exchange.
MOAB FIELD OFFICE	SURFACE MGT - PLAN	UTU 069813 01			PENDING	With the loss of our supporting geologist, Doug Powell, in May, 2009, we have not been able to achieve any progress on the resolution of this legacy site in FY-09. Resolution of this case has been complicated by the operator of record, Energy Fuels Nuclear, being absorbed by corporate mergers and acquisitions by Denison Mines Corporation and by the site being within the Monument. As soon as the office can obtain a replacement geologist, or other assistance as needed, our plan would be to visit the project area to document the disturbances requiring reclamation and contact Denison Mines regarding their reclamation liability acquired through their acquisition of Energy Fuels Nuclear. We are hopeful that Denison would undertake the necessary reclamation to resolve the case.
MOAB FIELD OFFICE	SURFACE MGT - PLAN	UTU 069840	M037/001	No bond	AUTHORIZED	Legacy, Project inspected in July and August 2009 BLM never received a POO and case has been open for well over 10 years. Surface disturbance in the form of pits, shafts and an adit. Needs reclamation. Contact operator to notify we will reclaim and invoice them for the costs if they do not reclaim in a given time period.
MOAB FIELD OFFICE	SURFACE MGT - PLAN	UTU 072488	S/019/035	\$8,200	AUTHORIZED	Letter to operator to add bond for monitoring wells and review reclamation.
MOAB FIELD OFFICE	SURFACE MGT - NOTICE	UTU 069828	E/019/031	No bond	PENDING	Mine site inactive. The BLM requested bond increase in January 2008, but operator refused in letter dated February 13, 2008. Equipment and building onsite. Should contact operator notifying them to bond for full amount or reclaim-if not bonded or reclaimed in a given time period, we will need to be ready to take action, reclaim ourselves and charge the operator.
MOAB FIELD OFFICE	SURFACE MGT - NOTICE	UTU 077878	E/037/120	No bond	PENDING	Inspect. Contact operator close case file unless there is surface disturbance. Operator requested extension. Cultural work done for Notice in 9/2008. BLM accepted notice and DOGM has accepted bond. Bonds have been calculated. LR2000 updates will update this case.
MOAB FIELD OFFICE	SURFACE MGT - NOTICE	UTU 076443	S/037/018	No bond	EXPIRED	BLM needs to properly dispose of equipment. Mine site cleaned up. Court order needs to be amended with removal cost. Update LR2000 case type and action taken to date at this site.
